Goren and Sons specializes in high security products and is an international leader in the field of gates and barriers. Since 1963 the company is Israel's leading and largest manufacturer in this sector.

Top Quality

In order to ensure the best quality, design and development activities take place under the same roof, in the company's 2700 square meters factory, that is located in Haifa Bay (not far from Haifa sea and air ports).

Goren and Sons quality management system is certified by the standard institution of Israel and by IQNet to ISO9001:2008.

Goren and Sons is approved and listed as a contractor for the Israeli government.

Design and Development

Goren & Sons design and development department can perform customization, modifications and adjustments of almost every product in order to meet client's requests or to conform to site limitations.

Engineering

Goren & Sons engineering department ensures that products meet customer specifications and provide solutions to engineering problems.

Expert Workforce

Goren & Sons employs expert installation and maintenance personnel, offering professional solutions for all company's products.

As leaders in its field, the company also provides consulting, advising and supervision services.

Areas of Activity

Access control; Security and guarding; consulting; perimeter protection – fencing and barriers.
