**T**he Homeland Security Academy at Zinman College at the Wingate Institute was established in 2007 and headed by a former Israeli Security Agency (ISA) senior officer previously head of the ISA Security and Combat Academy.

The Homeland Security Academy trains security managers, security officers, and functionaries operating in the public and private sectors, to execute all the activities required of them under routine conditions and during emergencies and crises.

The Academy also trains public organizations and companies on dealing with extreme emergency situations caused by natural disasters or resulting from human activities.

The Homeland Security Academy at the Zinman College at Wingate offers the most up-to-date knowledge and most advanced learning methods to endow its graduates with the tools required for coordinating staff work and managing and overseeing security layout. The purpose of this document is to present the courses contain and our quotation for its performance.

### Main idea

Security is not an end in itself but a means to enable organizations and companies to manage their daily routines and assure the personal security of employees, public and visitors utilizing their facilities.

Skillfully managed and implemented security is adapted to the nature, characteristics and the needs of the enterprise being protected. It also ensures efficient utilization of resources and budgets while blending in optimally in the activities of the organization. The planning, setting up and ongoing management of a security system require extensive professional and management knowledge.
