**ISDS - International Security and Defence Systems Ltd.** is a multi-national security company with a global outlook. ISDS offers extensive international experience in diverse security and defense areas, ranging from threat and risk assessments, security planning, system design and implementation, training, exercising, and auditing. ISDS has become a sophisticated global security consultant and integrator in areas spanning from national defense and homeland security to maritime and aviation security, VIP protection, police and military instruction, infrastructure security, safe city projects, multi-national enterprises and mega-event security.

ISDS Ltd. develops and provides targeted integrated security solutions to meet our clients' needs and demands. The group provides a vast array of security services to public figures, governmental agencies, non-governmental organizations, corporations, and others who face high-stakes security risks. With high quality experts in strategically distributed offices worldwide, ISDS provides the most cost-effective, responsive, and personalized customer care. We collaborate with decision-makers at every level to ensure efficient planning, communication, and execution for optimal security planning. The company's solutions include crucial aspects of the security concept: personnel, technology, procedures, training, and simulations.

In its more than three decades of activity, ISDS has participated in all areas of security projects: ISDS has secured Mega Sport Events like the Olympic Games and the World Cup, International Expos, and Music Events. Additionally, ISDS provides targeted integrated solutions to secure critical infrastructure in areas of oil, gas, mining, transportation, airports-TSA, seaports - IMO, communication, water supply and electric energy, among others. ISDS is a security consultant

and intelligence provider to some of the most famous anti-terror units, intelligence agencies, defense and police forces, as well as private organizations.

ISDS is registered and certified by the Israeli M.O.D., and operates according to the Israeli M.O.D. guidelines and regulations.

### ISDS Services

Our services include but are not limited to the following areas:

- **Threat and risk assessments** ISDS risk assessments aim to identify a wide range of threats including terrorism, crime, and loss prevention. ISDS' experts classify risks according to a level-system using a unique analytical systematic process.
- **Intelligence** ISDS has designed the Open Source Intelligence (OSINT) system to collect and analyze information from numerous sources, and develop an intelligence report.
- **Security design and project management** ISDS Security Design and Project Management put together the three main elements of security: People, Procedures, and Technology.
- **Training** The concept underlying ISDS's Training Services is that the Human FACTOR is the Key to success. ISDS offers a full range of training programs both in Israel and abroad.
- **Technology** ISDS provides access to advanced and effective security technology. The group emphasizes the importance of innovative and specialized security technology. ISDS Ltd. has an established relation with a wide range of technology and equipment suppliers that enables our clients effective access to Cutting Edge defense and home land security technology. ISDS Team provides the technology and the skills and knowledge necessary to apply it effectively.
