IsraTeam is a professional team of Israeli Homeland Security high-ranking reserve officers, who served formerly in the Israeli Home Front Command, IDF.

IsraTeam has extensive experience, both in Israel and internationally, in assessing potential threats, analyzing strategies and enhancing preparedness and disaster response planning.

The team members have played an active role in emergency planning and preparedness in the Israeli Homeland Security organizations, as well as in devising emergency strategies and doctrine.

The company has established and implemented training programs for security and emergency organization for war and for CBRN terrorism, earthquakes and other natural and man made disasters.

## Crisis and Consequence Management

IsraTeam is a professional team for Crisis and Consequence Management.

Disasters, whether caused by natural events, War, CBRN Terror or accidents - may cause loss of life, severe disruptions of social structures and material

losses, causing a severe economic and psychological burden on any nation.

With a proper Crises and Consequence Management system, planning and preparedness - Organization, Equipment and Training - this impact can be prevented or mitigated.

## Expertise and Know-How

With our expertise and know-how, we can save you plenty of time and money and lead you to the correct solutions according to your specific needs and resources.

Casualties and damages can be prevented or reduced and severe crisis may be solved at early stages by professional preparedness and timely response.

This approach starts with threat analysis, assessing the profile, culture and behavior of the affected population, identification of vulnerable communities and their specific needs, emphasizing the use of communication means.

Most emergency planning starts with defining, assessing and evaluating hazards and threats and establishing policies based on threat scenarios. The operational doctrine and proper solution to these threats will then be established.
