**A** leader in the field of development and manufacture of advanced fencing systems and access control, Kalram has been producing its high quality products for cities, government organizations, industrial plants and private institutions for over 45 years.

One of the world's most advanced companies in the field of metal working, Kalram uses state-of-the-art systems and cutting-edge technology to create unique designs and products tailored to the specific needs of its clients. Kalram's fencing systems can be easily and rapidly installed, making them the ideal choice for a wide range of needs including: area encirclement, security fences, decorative

fencing, barrier systems and land division, as well as temporary fencing for concerts or fair grounds.

In addition to its extensive standard product line, Kalram's development department readily manufactures custom products based on SolidWorkes 3D.

**Outline your needs – Kalram will fence them in.** High quality materials, sophisticated planning, closeattention to detail and strict quality control, assure safe, durable products which meet the International Standard ISO 9001-2000.

**For more information, consultation, or placement of an order contact Kalram directly.**
