**K**aril International Ltd. is providing Defense and Homeland Security agencies with advanced technologies and tools to meet current and future operational challenges worldwide.

Karil is a member of the **Mistral Group**, a team of independent companies operating in different markets, while collectively sharing the mission of Bridging operational gaps in the defense and Home Land Security markets with practical, innovative and advanced technology solutions.

Our solutions are used by field units and law enforcement agents such as US Secret Service, US Army, Israeli Defense Forces, National Police, Border Patrol, international airports and law enforcement agencies throughout Europe, Asia and Africa.

## Operational Solutions Tactical Equipment

We offer a wide range of solutions, from non-lethal weapons and LIC solutions, tactical sensors, radio systems and communication to a wide array of weapon optics for day and night operations, for all ranges and all types of weapon systems. Our systems are deployed in operational forces worldwide including U.S Army, IDF, and additional law enforcement and defense agencies.

## Explosive Detection and Identification

Karil's Explosive Detection and Identification products are world leaders in presumptive field tests for explosive substances or trace residues. The kits are based on wet chemistry, colorimetric reagents, and provide **'on-the-spot' results**. Our products detect and identify different type of **solid or liquid explosives**, such as TNT, C4, TATP, Ammonium Nitrite and more.

## Blast Mitigation, EOD and Public Safety Solutions

- Blast containment Receptacles (BCR): Blast resistant trash receptacles providing full protection for the nearby crowd against blast Impact and fragments, designed to protect the public from the harmful effects of an explosion
- Explosion Containment Vessels (stationary and mobile) for up to 15 kg TNT: proven to safely contain, store, transport or protect explosives.
- Explosive Ordnance Disposal Vessels: designed for secure transportation and detonation of Improvised Explosive Devices (IED) and Unexploded Ordnance (UXO). The vessels can fully contain and Gas Tight the content, the vessels are designed for repeated use.

## Drug Detection and Identification

Easy to use trace detection and identification colorimetric field kits offering proprietary "on-the-spot" reaction, which ensures a testing process that is convenient, **fast and efficient with immediate results**. Instant color reaction indicates the type of drug found. No additional tools or equipment is required.

## Forensic Products

Our line of forensic and investigation products provide law enforcement officers, investigators and forensic technicians distinct advantages for field and laboratory use, by adding additional new and innovative investigative tools, based on our Aerosol technology, to the traditional arsenal of tools and methods.

Karil is a registered and qualified supplier to the Israeli MOD, Military and Law Enforcement agencies as well as a qualified supplier for other governments and international industry customers.

- ISO 9001:2008 Certified
- A TRACE-certified company
