Magal S³ is a leading international provider of security, safety and site management solutions and products.

Over the past 40 years, Magal S³ has developed a unique set of cutting-edge products for perimeter security applications. This long and rich history includes designing and implementing solutions tailored to fit sensitive sites in the most threatening environments in the world.

Magal S³'s track record includes thousands of customized installations for hundreds of satisfied customers in more than 80 countries.

With years of defense industry experience in Israel and abroad, the company's system designers and project managers plan and execute complex security solutions across a broad range markets.

Magal S³ cooperates with large system integrators to provide focused and professional solutions to complement their projects; Magal S³ also delivers turnkey tailored solutions directly to customers. Magal S³ works through its local offices and/or partners worldwide to deliver services, support and implementation.

Our security solutions enable effective real-time deterrence, detection and delay of intruders enabling the customer's first responders to diagnose, decide and defeat threats and manage their sites efficiently.

Integration Expertise

Magal S³'s collective experience in solving integration challenges involving multiple vendor systems translates directly into cost savings and performance enhancements for customers. Magal S³ begins every solution by working together with security consultants to assess the customer's needs, existing assets and operational requirements.

Magal S³'s strategy comprises an end-to-end solution in securing vulnerable outdoor areas. Utilizing years of experience and technical know-how, the company aligns its solution to the relevant application/market's security risk analysis, plans, policies and procedures. Magal S³ conducts comprehensive training, takes responsibility for the full installation and constantly updates and refines its proactive and dynamic security approach. Magal S³'s solution is completely tailored to customer needs and requirements, and can be fully integrated with third-party systems and equipment.

Performance Testing

Magal S³ has a culture of rigorous technical, operational and environmental testing at its privately owned outdoor test facility, which is the largest of its kind in the world.

All products receive year-round scenario-based testing, designed to verify their ability to withstand years of exposure to extreme weather conditions.

In addition, the company continually solicits feedback from military specialists and civilian perimeter security experts using its products around the world.

Magal has strong presence in high security markets:

- Airports
- Seaports
- Energy: Nuclear, Oil and Gas
- Borders and Border Crossings
- Prisons / Corrections
- Utilities and Industry
- Safe-City and Municipalities Applications
- Critical Infrastructure (CIP)
- Mega Sports and Special Events
