**M**agam Safety Ltd. designs, manufactures and distributes a wide range of rescue, survivability and protective equipment for over 70 years.

Magam Safety products are developed in close relationship and constant feedback from the Israeli Defense Forces (IDF). The company is the sole supplier of parachutes, Anti-G suits and fuel tanks to the IDF.

Magam's R&D and production facility is located in northern Israel and employs top-line professionals. Magam Safety offers comprehensive solutions - from research and development, product design, materials consultation, rapid prototyping trial, serial and mass production, product test reporting and certification, and complete after-sale support throughout the products' life cycle.

As a subsidiary of Star Defense Systems (SDS), Magam Safety is ideally positioned among key players in the hi-tech military industry. The Group's strategic alliances and commitment to R&D provide a solid backbone for the development of products and solutions at the cutting edge of technology.

## Areas of Activity

### Rescue and survivability equipment

- Parachutes for paratroopers, pilots, cargo, and brake chutes
- Anti-G suits
- Life-saving jackets

### Rubber and self-sealing fuel tanks

- Rubber and self-sealing fuel tanks for Aircrafts, UAVs, Armored fighting vehicles (AFVs) and Battle tanks.

### Inflatable equipment

- Inflatable life rafts and boats
- Inflatable Decoys

### Personal protection equipment

- Ballistic helmets
- Bullet-proof vests
- Advanced armored plates

Magam Safety provides both off-the-shelf as well as custom made products & solutions tailored to meet customer's specific needs and requirements.

The company's products encompass a variety of combat proven solutions and are made from state-of-the-art materials.

### Quality Assurance

Magam Safety complies with strict quality control procedures according to international standards, from performing acceptance tests of raw materials till full scale inspection of the finalized product.

Magam Safety is approved to perform self-inspection processes to Israel's major military institutions; Israeli Ministry of Defense (IMoD), Israeli Air Force (IAF), Israeli Aircraft Industries (IAI), Israel Military Industry (IMI), The Ground Forces Command and RAFAEL.

The company's products are designed, manufactured and tested in accordance with international standards: ISO 9001:2008 Quality Managements Systems, ISO 14001:2004 Environmental Management Systems and are under the control of the Standards Institution of Israel.
