Mercaz Hasolela - MEIRCELL Ltd. was established in 1995.

Over the years, the company has accumulated unique experience in the field of rechargeable batteries assembly, wirings and a wide range of component assemblies.

Company policy has been based on quality control, customer service and strict adherence to time schedules.

Meircell acts as a value added assembler for major Li-Ion cell such as Samsung, Panasonic, Sanyo and Moli. Our custom battery packs are assembled with Lithium Ion, Lithium Polymer, Lithium Iron, Nickel Metal Hydride, Nickel Cadmium, Sealed Lead Acid, Primary Lithium, and Alkaline cell chemistries. We provide you with the optimal safe and reliable solution for the battery and charger regardless if the pack is basic design or equipped with a smart electronics, has low or high capacity specifications or is produced in small or large volume.

Technology Description

• Standard Battery Packs

Our Standard assemblies typically include protection devices such as PTC's, fuses, thermostats, and protection circuitry (PCM) when Li-Ion/ Polymer based cells are utilized.

• Smart Battery Packs

Our smart packs are more complex battery assemblies, which enable full monitoring of battery internal parameters, like current, voltage, temperature etc.

• Rechargeable Batteries & Chargers

- SMBus, 1-Wire, RS-232/485/422, USB Compliant Smart Battery Packs
- Battery Pack Chargers & Smart Charger modules
- Energy Cases for Portable Power Supply according to customer's need
- PoE Power Systems
