Mul-T-Lock is a world leader in developing, manufacturing, marketing, selling and distributing High Security products for institutional, commercial, industrial and residential applications. Since 2000 Mul-T-Lock is fully owned by ASSA ABLOY, the global leader in door opening solutions, with an annual turnover of more than €4.5 billion and around 41,000 employees worldwide.

ASSA ABLOY's shares are traded on the Stockholm Stock Exchange.

Mul-T-Lock's Mission

Mul-T-Lock strives to be the preferred partner for Locksmiths & System Installers globally, by providing differentiated, relevant and innovative High Security locking and access control solutions.

Leading-Edge Design and Manufacture

Mul-T-Lock began operations with a patented multi-point lock, and over the years has developed hundreds of High-Security locks, cylinders, padlocks, advanced electro-mechanical locking systems as well as complementary products. Emphasis is placed on R&D and design and the company's factory is fully automated, using SAP-ERP systems, the most advanced computer programs and robotics, and specially designed machinery, much of which is manufactured by Mul-T-Lock itself. The company has a staff of mainly highly skilled personnel who have worked for many years at the company.

Mul-T-Lock products comply with the toughest international standards such as UL, CEN, VDS, SKG, CPC and A2P.

The company has received three certifications from the Standards Institution of Israel: ISO 9001:2000, ISO 14001, SI 18001.

Innovative Products – Safety, Security & Convenience

The company holds hundreds of international patent registrations for its innovative products, which provide safety, security and convenience.

Cylinders: Suitable for use in doors, door locks, cabinets, safes, duty-free carts, and electrical and telephone wire cabinets, etc.

Locks: Including padlocks, multi-point locks for steel and wooden doors, deadbolts and others.

Electronic Door Solutions: Electromechanical cylinders and locks, strikes, magnets and automatic door operators.

Complementary Products: Lock cases, door closers, hardware, panic devices and safes.

Automatic Machinery: Automatic assembly machines and automatic keycutting machines.

Automotive: Hood locks, gear locks trailer & container locks.

Mul-T-Lock tailors solutions to individual needs, and master-key systems to enable any user to operate a large number of locks according to authorization. Special software enables an organization's security officers to manage and control the master-key systems.

Worldwide Marketing

Mul-T-Lock's products are marketed worldwide via its own 13 selling units and through a global distribution network in nearly 100 countries, operating more than 20,000 service centers, equipped to provide service to more than 100 million users. Its selling units are located in the US, Canada, Mexico, UK, France, the Czech Republic, Argentina, Italy, South Africa, Kenya, Tanzania, Belgium and Turkey. Mul-T-Lock also serves O.E.M.s, including door manufacturers and institutions. The company's customer base in Israel includes Bezeq, the Israel Electric Corp. and the Ministry of Defense, as well as British Airways, Air France, McDonald's, Pizza Hut, supermarkets, universities, hospitals, museums located worldwide.
