Netline Communications Technologies delivers cutting edge EW and spectrum dominance solutions to the global defense and homeland security markets.

Netline develops, manufactures and sells advanced RF control systems including:

- Active and reactive counter- IED jammers
- COMM jammers
- Cellular & prison jamming systems
- Communication detection systems
- Multi-mission COMMINT systems with interception and localization capabilities.

JAMMING

Netline's C-Guard line of jammers includes:

- Vehicular jammers
- Portable jammers
- Manpack jammers
- Miniaturized handheld jammers
- Prison jammers

Netline's jammers protect against remote detonation of IEDs, block communications and isolate arenas.

C-Guard jamming systems are used worldwide for:

- Forces protection
- VIP protection
- Convoys and route clearance
- SWAT operations
- EOD missions
- Drug enforcement
- Riot control
- Prison cell phone control

DETECTION

Netline's detection systems detect potentially threatening communication, indicating cell phone use in prisons and revealing eavesdropping and information leakage attempts in government, corporate and other secured confined information facilities.

INTERCEPTION

Netline's cell phone interception systems include semi-active and passive systems, offering full range of managed access features, Systems enable white list jamming enabling authorized subscribers to use their cell phone while unauthorized cell phones are denied service.

COMMINT

Netline's Communications Intelligence solutions integrate a variety of tactical SIGINT capabilities including spectral analysis, signal classification and demodulation, cell phone monitoring and direction finding – all tailored per customer specifications.
