New Noga Light (2000) Ltd. (NNL) was founded in 1987 and is the leading supplier of night vision and thermal imaging systems to the Israel Defense Forces.

Based on over three decades of military and special operations experience, and leveraging special access to unique technology and top industry expertise - NNL delivers a variety of electro-optic systems, based on Image Intensifying Tubes and Uncooled Thermal Technologies as well as testing equipment and accessories.

NNL is one of the few companies providing world-class refurbishment and upgrade services for Image Intensifying Tubes and optical systems.

Reputation and Knowhow

With an ever-increasing pool of both domestic and international law enforcement and homeland security clients, NNL also specializes in custom or shared development of night vision systems to accommodate its specific end-user requirements. Fully committed to client success, NNL places special emphasis on quick deliveries, dynamic response to client needs, quality after sales support and tailored training programs to help users maximize their Return on Investment.

The seasoned NNL management team brings broad and multidisciplinary experience from the Military, Special Forces, and Homeland Security markets. Complementing the management are experienced and professional technical teams who together constitute a creative, professional and industry-leading force.

NNL is ISO 9001:2008 certified.

Main Product Lines

- Day and night vision systems for Sea, Air and Land
- Thermal imaging systems for ground forces
- Test and maintenance equipment
- Refurbishment and upgrade services
- Operational and technical training services

NNL is a subsidiary of Star Defense Systems (SDS), one of the largest defense companies in Israel, offering innovative defense solutions for Sea, Air, Land, and HLS Forces worldwide.

As a subsidiary of SDS, NNL is ideally positioned among key players in the hi-tech military industry. The Group's strategic alliances and commitment to R&D provide a solid backbone for the development of products and solutions at the cutting edge of technology.
