Featuring a rich line of Thermal Imaging and Near-Infrared Illumination products, applications and services for the security, defense, safety, and aviation markets, Opgal puts at the disposal of its customers an unmatched broad and varied product line addressing their every need. Boasting 30 years of field proven experience, Opgal partners with its customers providing the optimal solution for every threat.

Providing one of the broadest product lines of innovative thermal imaging and near-infrared illumination cameras, Opgal brings to the market a unique and highly differentiated set of solutions. It is the breadth and depth of this product line that establishes Opgal as a prominent provider in the complex and wide -ranging defense, security, safety and aviation markets.

In the Security market, Opgal enables transportation, city and state government, industrial and utility customers to detect, recognize, and identify security threats during the day or in complete darkness and difficult visibility conditions.

Taking a lead position in the Defense arena, Opgal is known for working closely with customers to deliver tailor-made solutions that address their specific needs.

In Safety, Opgal provides gas and hazardous material leak-detection and fire detection systems. Lastly, the company was the first to provide an FAA-approved landing assist and situational awareness system for the Avionic industry.

“Seeing is believing” the saying goes, and Opgal enables its customers to clearly see in adverse visibility conditions, and more so, to see beyond the picture video. Investing decades in research and development, we bring to market state-of-the art and unmatched image-processing capabilities. They enable users to see beyond the standard picture, exploiting minute levels of energy and turning them into meaningful video data. We facilitate the detailed insight required to make the correct assessment of a situation and take appropriate action.

Key Benefits for Customers and Partners

- A wide variety of products and technologies
- Unparalleled video quality for accurate analytics with minimal false alarms
- Thermal imaging and near-infrared illumination cameras
- Tailor-made solutions for defense customers for fast time to market
- Nearly 30 years of field-proven technology and experience

Backed by years of success, Opgal’s products are installed with hundreds of customers in over 50 countries.
