**O**rli Fences is a premier manufacturer of iron fences, gates and railings. The company's products are widely used by residential, commercial, industrial and government facilities, including high security factories, detention facilities, educational institutions and recreational parks. Orli Fences has a 20 year history of providing the highest quality standard and the widest selection of iron fence products in the industry.

## **Modular Fences for Multiple Applications**

The company manufactures modular fences and rails configurable to meet a wide range of applications, including police barricades, airport security oil refineries and border fences. The state of the art design of Orli's products provides higher strength and protection from weather and vandalism.

## **High-Performance Finish**

All elements of the company's product are uniquely coated by hot dipped galvanization process for many years of performance and beauty. Finishing is available in polyester-based powder paint in shades displayed in the RAL catalogue.

## **Easy-to-Install**

The company's easy-to-install modular products contain rigid mesh in-fills and profiles. Orli provides fence assembly through non-visible connectors and screws that do not require welding that can be damage the fence finish and paint coating.

## **Customized Gates**

The company designs customized gates for each fence or railing model to meet the needs and requirements of customers. Orli's gates can be powered by hydraulic or electrical mechanisms that can be operated on site or via remote control.

The company also designs and develops customized models to meet customer's special needs and requirements.
