PineApp™ is a leading Perimeter Network Security Solution provider. All PineApp Solutions can be deployed on a virtualized platform and are compatible with VMware, Hyper-V and XenServer. PineApp provides comprehensive network security solutions for SMBs, Enterprises and Service Providers (ISPs, MSPs, Telcos). PineApp's product portfolio spans AS/AV Email Security, Email Encryption, Web-filtering and an innovative solution for ISPs to block outgoing spam and neutralize botnets.

PineApp solutions are also ideal for service providers (ISPs) who wish to offer Cloud-Managed-Services and a DRP (Disaster Recovery Plan) solution to their customers.

Founded in 2002, PineApp has distributors in more than 50 countries.

Mail-SeCure

PineApp™ Mail-SeCure™ is a leading email security appliance. Mail-SeCure protects emails in two phases:

- Perimeter security engines that focus on stopping the vast majority of threats by looking at the credibility of their sources before they penetrate the customer's network.
- Post perimeter protection includes in-depth analysis by different anti-spam content inspection engines. PineApp's Mail-SeCure Appliance has recently gained the Anti-Spam Checkmark Certification at the Premium level, achieving a detection rate of over 99.8%.

Outbound Spam Guard

The PineApp™ OSG™ is a carrier-grade solution that can be easily deployed to scan and block up to 99% of all unwanted or malicious botnet generated email traffic (i.e., spam).

The OSG functions as a transparent SMTP proxy that

quickly informs the Service Provider about all outbound email activity inside their network with granular level statistics about which IP addresses within the network is infected by a spam-generating botnet.

Surf-SeCure

PineApp™ Surf-SeCure™ provides a real-time filtering system for protecting enterprise level organizations from Internet-based threats, as well as providing organizations' surfing policy enforcement.

Surf-SeCure inspects HTTP and FTP traffic and provides full protection against known and emerging Viruses, Worms and Trojan-horses. Surf-SeCure facilitates organizational productivity, optimizes bandwidth consumption and reduces liability.

PineApp Managed Services

PineApp Solutions can be effortlessly deployed "in the cloud" and provide all manner of Service Providers (Telcos, ISPs, Mobile Carriers, MSPs, etc) unique technologies that thereby ensuring a complete managed service scheme.

- Email security - Based on the award winning Mail-SeCure product, PineApp's cloud service version provides comprehensive email security, with much more than just blocking Spam and viruses. With advanced mail policy and data leakage prevention tools, the solution is ideal for the protection and management of all organizations that already are receiving services from the Service Provider.
- Email encryption - As part of Mail-SeCure's policy engine, PineApp's mail encryption solution is a perfect solution for cloud based email encryption. With a secured route feature, the mail encryption solution is a cost-effective answer to securing outgoing emails.
