

Semi-Conductor Devices (SCD)

Semi-Conductor Devices (SCD) designs, develops and manufactures a full spectrum of infrared detectors and laser diodes. The company's advanced concepts and cutting-edge technologies have positioned it as one of the world's leading suppliers in its sector.

Brief History

SCD has accumulated more than two decades of know-how and expertise and produced tens of thousands of detectors. The company's broad range of capabilities provides a decisive edge in being able to supply affordable, reliable solutions to precise demands, within very short time frames.

Products and Services

InSb - Indium Antimonide for 3-5 μ m Spectrum

320 x 256, 640 x 512 and 1280 x 1024 matrix arrays with digital CMOS Readout.

MCT - Mercury Cadmium Telluride for 8-12 μ m Spectrum

288 x 4, 480 x 6 TDI Photovoltaic linear arrays

VOx - Vanadium Oxide for 8-12 μ m Spectrum - Uncooled

384 x 288 and 640 x 480 microbolometers with 17 and 25 μ m pitch.

High Power Laser Diodes

- QCW bars and stacks up to 1000 W peak power.
- CW bars and stacks. Passive and active cooling.
- Fiber Coupled Laser Diodes, high power.

Other Important Information

Typical Applications

- IR seekers
- Thermal Imagers
- Smart munitions
- Night navigation systems
- Laser rangefinders
- Laser designators

Close Customer Relations

The close relationship between SCD and well-established systems houses such as Rafael, Israel Aircraft Industries, Elbit and Elop ensures that SCD's detectors are specified and produced in accordance with the latest military requirements.

R&D Activities

The continuous feedback from the Israel Defense Forces lays the ground for new R&D activities to meet future battlefield demands.

Custom-Designed

SCD offers a complete range of off-the-shelf and custom-designed detectors in various configurations.

Total in-house design, development and advanced manufacturing capabilities assure

quick response and give SCD full control over its products from start to finish.

Seeking

Strategic partner; Major customers.
