X-Test™ is a member of the Tamar Group, an Israeli group of companies with more than 20 years of experience in the field of explosives and security. Our team of security specialists, chemists, electricians and production technicians continues to develop new training aids, using the most advanced technologies. Our goal is to enhance the human factor in the security sector, through the use of technology, education and training.

X-Test™ products and services include:

- **Explosive Simulants:** Inert explosives and concealed inert IED (Improvised Explosive Devices) for teaching, on-going training and performance auditing. Our products precisely replicate actual explosives in color, texture, odor (canine compatible), density and X-ray and CT signature.
- **Screener Training and Operations Management System:** XD Systems software enables easy management and rapid implementation of critical

training, enhancing the level of preparedness of security personnel at secured facilities while improving the speed and detection level.

- **Courses and Training:** programs for all relevant security environments. Aviation Security, Operating Scanning Technologies, Explosives, K-9 Handlers, EOD, SWAT, Customs Officers, Forensics Technicians, Security Managers, Security Trainers.
- **Consulting Services:** Headed by former security officers, we offer comprehensive consulting services in all areas of expertise.

Our clients include:

TSA, MOD, DOE (USA), UK Home Office, CATSA (Canada), STAC & DGAC (France), Port of Calais (France), ICTS (France), Schiphol Airport (Amsterdam), Mexico City Airport, Katowice International Airport (Poland), Hong Kong International Airport, Charleroi Airport (Belgium), Securitas (Belgium), G4S (Belgium), University of Lausanne (Switzerland), the Security Bureau of Chinese People's Armed Police Force, Indian Special Forces, ISA (Israeli Security Agency), El-Al (Israel).
