Yehuda Security Systems (Y-SEC) is an Israeli-based security integration company that provides end-to-end security solutions to assets and facilities. Based on cutting-edge innovative technologies and experience accumulated from the demanding Israeli security environment, all Y-SEC solutions can be tailored to specific customer needs and demands.

Part of the Yehuda Group

A member of Yehuda Steel Group, the largest steel manufacturer in Israel and leading provider of perimeter protection systems, Y-SEC was established by Yehuda Fences Ltd. to provide integrated security solutions to national, government and private sectors around the world. The company employs a team of dedicated, former high-ranking professional officers with extensive expertise in security issues. Trained in the Israeli military and other well-known security agencies, Y-SEC's team includes civil, electronics, communications and integration engineers, threat and risk analysts and implementation experts.

Meeting Customer Needs and Demands with End-to-End Solutions

Y-SEC's ability to design and implement integrated security systems is based on a comprehensive understanding of customer needs and demands. Gathering information, analyzing risks and evaluating consequences, enables Y-SEC's experienced security experts to develop the optimal and most suitable integrated solution for each and every customer. This is then followed by a budget estimation, master plan development and detailed engineering design, enabling Y-SEC to accompany customers throughout implementation, training and maintenance of their tailored security solutions.

Integrating State-of-the-Art Technologies

Y-SEC's integrated security solutions are designed and planned to provide the best solutions customized to specific and unique customer needs and demands. Integrating the most innovative, state-of-the-art technologies, Y-SEC focuses on four main areas of activity: physical fencing and barriers, perimeter intrusion detection systems (PIDS), high resolution CCTV surveillance systems and access control systems.

Vendor of Choice for National, Government and Private Sector Facilities

Y-SEC's expertise and understanding of security issues, combined with the company's extensive experience in planning, designing and delivering integrated security solutions, make Y-SEC the vendor of choice for national, government and private sectors. Typical examples of installations and facilities using Y-SEC solutions include airports, seaports, international borders, electricity and nuclear plants, oil refineries and pipelines, military key installations, jails and detention centers, coastal defenses, hospitals, public transportation, radio and TV stations, hotels, municipalities, sports facilities and financial institutions.
